

Primary Enterprise Event

Education Business Partnership Link are holding a Primary Enterprise Event at Lancaster and Morecambe College on 1st and 2nd July.

Over 300 pupils from 10 Lancaster and Morecambe schools will be attending. The pupils will work in small groups (approx. 8) and take part in 3 workshops linking maths to the construction industry, with the aim of illustrating that maths can be fun and that it has a practical application in most occupations.

The workshops are:

- * **Plan a Garden (Plan and cost the garden of a new house).**
- * **Build a House (of wood in the joinery workshop).**
- * **Plan a Communal Building (Decide what facilities to include and plan it).**

To ensure the success of the day, we need adults to come along and work with the groups, to ensure that all the pupils are participating and to help stimulate ideas.

If you are interested in attending, or would like further information, please contact:
