

# Maths Game

## Turn Two

A game for 2 players

### You will need:

- A set of 1 – 10 digit cards (ace to 10 if using playing cards) for each player

### Instructions

Each player takes their set of cards, shuffles them and places them in a pile face down in front of them.

They then turn over their two top cards and add their numbers together.

The person with the highest score takes all the cards that are face up and puts them to the bottom of their pile.

The game continues until one person has won all of the cards.

### Information for Parents/Carers

This game is to reinforce children's addition and subtraction knowledge in EYFS and Years 1, 2 and 3 and their times tables knowledge in Years 4 to 6. For younger children, provide them with objects to help count on with, such as coins, buttons or sweets.

For some of the calculations in the game, ask your child have they solved it. Encourage them to solve the calculations mentally.

As a guide to the numbers to work with for your child:

**Reception:** Use the 1 to 10 set of digit cards, turn over one card each and the greatest value number wins them both.

**Year One:** Use the 1 to 10 set of digit cards, turn over two cards each, add them together and the person with the greatest total wins all four cards.

**Year Two:** Use the 1 to 10 set of digit cards, turn over three cards each, add them together and the person with the greatest total wins all six cards.

**Year Three:** Use the 1 to 10 set of digit cards, turn over three cards, use them to make a two-digit number and a single number, add them together and the person with the greatest total wins all six cars.

**Year Four:** Use the 1 to 10 set of digit cards, urn over two cards each, multiply them together and the person with the greatest product wins all four cards.

**Years Five and Six:** Use the 1 to 12 set of digit cards, turn over two cards each, multiply them together and the person with the greatest product wins all four cards.
